Working with ITS

We are committed to supporting Therapists to work within the independent sector and to help them to continue to grow as therapists. We pride ourselves on being able to offer therapists the ability to build their caseloads to suit their needs; offering ultimate flexibility. We have found this extremely motivating for therapists who want to combine their career easily with further study, parenthood or other working commitments.

At Integrated Treatment Services we support you to build a caseload in your preferred area and clinical areas of interest. We also support you in developing your skills with client groups you may have not had the opportunity to work with previously.

We have access to a network of clinics around the UK and you will have the opportunity to see individual clients in both clinic and home environments.

Many of our team work also within our contracted school settings on rolling annual posts.

The schools generally work with us for a full academic year and commit to us for that period of time and we ask the same from the therapist.

Each party knows that each other is committed for the academic year: giving the school consistency and you a reliable source of income.

We require additional team members to work in the following areas: [Read more on our website](#) and to apply you can email us your cv on careers@integratedtreatments.co.uk

Most roles are to commence in September 2017 but some work may be necessary as part of a handover in July 2017, ad hoc work may also be available during the Summer break - you can combine your role with ITS with other work (nhs or non SLT) or study
