

ENHANCING COMMUNICATION, ENRICHING LIVES!

Expert Speech & Language Therapy in
Schools for Children and Young People

MAXIMISE IMPACT OF SLT WITH OUR FLEXIBLE THERAPY BUNDLES

Strategic Termly & Half-Termly Planning: Partner with our speech therapy experts for dedicated planning sessions with your inclusion leads and SENCOs. We'll help you strategically plan and allocate your therapy sessions over a half-term, ensuring each session aligns with your key priorities and desired outcomes.

Tailored Support to Achieve Your Goals: Once your key agendas for the term are set, we'll provide a range of options to help you achieve these. This includes recommending suitable therapy interventions, identifying relevant training sessions, facilitating problem-solving discussions with teachers and TAs, and offering parental support. You choose the most relevant areas to focus on each half-term. Assessment and direct therapy sessions may also be your priority.

Maximising Resources Through Targeted Assessments: Make the most of your budget with a strategic approach to assessments. We identify students who can be assessed online, increasing the number of children supported, while prioritising in-person visits for those requiring face-to-face evaluations. Our therapists can conduct multiple assessments in a single day to maximise efficiency. They provide detailed reports and targets.

Therapy Interventions: We deliver the latest therapy interventions bespoke to your students, based on their presenting needs. Direct therapy may include 1:1, paired, small group and whole class.

Upskilling Your Team with Expert Training: Enhance expertise across your setting with our comprehensive training sessions. We offer certified courses such as Makaton and TEACCH, as well as non-certified training like Colourful Semantics and Visual Communication Environments.

Ongoing Support for TAs Running Interventions: Ensure continuous progress by linking your TAs with a dedicated speech therapist. Our therapists provide guidance on intervention strategies, refine group and 1:1 session plans, and offer creative solutions to keep therapy interventions effective and moving forwards, without waiting for your next SLT visit.

Developing Communication Leaders Within Your Schools: Strengthen in-house expertise by working with identified communication leads in your setting. We support initiatives like communication-friendly spaces and help you establish your own team of communication assistants to drive long-term progress. Regular check-ins with a SLT will increase your team's confidence.

EHC Plan Contributions & Review Support: We provide professional input for Education, Health, and Care (EHC) plans, ensuring detailed written contributions and representation at reviews where needed.
